REPORT OF WORKSHOP ON "SEED BALL ACTIVITY"

The workshop on "Seed Ball Activity" conducted by environmental consultant Rashmi Joshi in the L1 classroom was a hands-on and engaging session aimed at promoting environmental conservation and biodiversity. Rashmi Joshi's expertise and passion for the environment shone through as she guided participants through the process of creating seed balls, a simple yet effective technique for reforestation and habitat restoration. Through her interactive presentation, Joshi highlighted the importance of seed balls in mitigating deforestation, combating soil erosion, and fostering the growth of native plant species.

Attendees enthusiastically participated in the seed ball-making process, learning about the significance of selecting indigenous seeds, clay, and compost to ensure the success of their seed balls. Joshi's guidance and encouragement created a collaborative atmosphere where participants exchanged ideas and insights into sustainable land management practices. Moreover, the workshop provided a platform for fostering a deeper connection with nature and instilling a sense of responsibility towards environmental stewardship among participants.

As participants dispersed with their handmade seed balls, the workshop left a lasting impact, inspiring individuals to take proactive steps towards environmental conservation in their communities. Rashmi Joshi's expertise and dedication served as a catalyst for empowering individuals to play an active role in restoring ecosystems and preserving biodiversity. The workshop served as a testament to the transformative power of grassroots initiatives in addressing environmental challenges and nurturing a more sustainable future for all.
